NetManager™ High Capacity Horizontal Cable Managers

specifications

The high capacity horizontal cable managers shall be capable of managing high performance cable on the front and rear of any 19" EIA rack. The high capacity horizontal cable managers shall be molded plastic with bend radius fingers that protect the cable. The fingers shall be inset towards the rack to allow easy access to patch cords and terminations. Standard pass through holes shall incorporate bend radius control. Dual hinged covers shall allow access to the cable pathway.

key features and benefits

Inset fingers	Fingers slope inward offering greater access to network cabling for easier moves, adds, and changes				
Deep channel opening	Provides increased cable capacity in less rack space				
Front finger spacing	Wide front finger openings easily accommodate Category 6A and Category 6 copper cables speeding installation and reducing maintenance costs				
Rear finger spacing	Rear cable management finger spacing utilizes open D-rings for greater accessibility				
Dual hinged cover	Opens 110 degrees to the top or bottom to provide complete access to the horizontal pathway without having to remove the cover				
Flush appearance with NetRunner™ High Capacity Vertical Cable Manager	Used together to improve data center and telecommunication room aesthetics				

applications

Panduit® NetManager™ High Capacity
Horizontal Cable Managers provide an efficient
way to manage high performance copper, fiber
optic, or coaxial cables on any 19" rack. Fixed
inset fingers on the front and back allow easier
access to the ports for moves, adds, and
changes. Fixed bend radius fingers organize
and protect patch cords as they exit patch
panels and as they transition into the vertical
pathway. All of these features combine to

provide the user with a horizontal cable management solution that simplifies cable routing in a finished professional appearance. When used with Panduit® Mini-Com® Patch Panels, patch cords, vertical cable managers, and racks, the user receives a total system that satisfies functional and aesthetic requirements for data centers and telecommunications rooms.
